

Asilbek Abdunabiyev

+998946166663 asilbekabdunabiyev@gmail.com Samarqand

Summary

Full-Stack Developer with hands-on experience across frontend design and backend development. Built and contributed to platforms serving **70,000+ users**, including a Telegram-based Premium/Stars purchasing platform processing **\$10,000+ in monthly transactions**, alongside responsive, production-grade websites for education, tourism, and car rental industries. Skilled in **HTML, CSS, JavaScript, PHP, Node.js, Python, and Django**, with practical experience in **Telegram bot development, payment system integration** (Click, Payme, Atmos, Fragment), and **CI/CD deployment**.

Experience

Sam Car Renta LLC, *Frontend Developer*

02/2026 – 06/2026 | Samarqand, Beruniy

- Contributed to the **frontend design and development** of [samcr.uz](#), an online car rental platform serving customers in Samarkand.
- Built **responsive UI components** and page layouts using **HTML, CSS, and JavaScript** within a PHP-based system.
- Developed the **car catalog interface**, showcasing vehicle listings (e.g., **Genra, Spark, Nexia 3, Changan Eado**) with pricing, descriptions, and rental terms.
- Implemented the **vehicle booking/order form** (name, phone number, rental date, comments) enabling customers to request a car rental online.
- Designed content sections covering **rental terms, car insurance information, and terms of use/liability**.
- Built key **feature highlight sections** (fast rental process, full insurance coverage, clean vehicles, loyalty program, delivery and pickup service, technical maintenance).
- Ensured **responsive display and cross-browser compatibility** across devices.

PremiumHub, *Backend Developer*

09/2025 – 01/2026 | Samarqand, Dahbed

- Developed a globally growing **Telegram bot** for purchasing **Premium and Stars**, built with **Python and MySQL**, offering fast, affordable, and reliable service to users. **The platform processed \$10,000+ in monthly transactions**.
- Integrated payment systems including **Click and Fragment**, enabling seamless purchasing of Telegram Stars and Premium subscriptions, and delivering a secure and reliable payment experience for customers.
- Implemented a comprehensive user engagement system, including a **Top Rating leaderboard**, a personal **"My Account" dashboard** for tracking order and purchase history, and a **referral program** enabling users to invite friends and earn rewards — significantly boosting user retention and organic growth.
- Led **DevOps automation** by designing **CI/CD pipelines**, automating deployments, and providing production-grade server support using **Docker**, ensuring system reliability and high availability.
- Built a **role-based Admin Panel** (available both in the bot and on the website) featuring real-time analytics, promo code and advertisement management, user management, and **Excel export functionality**. Implemented a **granular permission system** allowing the main admin to grant sub-admins access to specific features only.
- Designed an **event-driven notification system** to automatically deliver reminders and important updates to users.

Samcity Media, *Frontend Developer*

03/2025 – 09/2025 | Samarqand, Bulivar

- Built [registon.uz](#), the official website of the **Registan Ensemble Directorate**, together with the Samcity Media development team — from initial layout to final deployment.
- Designed and implemented **responsive UI components** and page templates using **HTML, CSS, and JavaScript** within a **Joomla-based CMS** environment.
- Built the **multi-language (3-language) interface**, ensuring consistent typography, styling, and visual identity across all pages.
- Developed the site's **main navigation and menu structure**, covering sections such as **Heritage** (History, Museums, Architectural Monuments, Articles, Epigraphy), **Media Center** (News, Announcements, Video, Photo Gallery), **Information**, and **Contacts**.
- Implemented the frontend of the **online ticket purchasing flow**, including a multi-step booking process (**Tour → Origin → Guests → Payment**), designed for both local and international visitors.
- Integrated the frontend interface with **payment providers (Click, Payme)** together with the backend team, ensuring a smooth and reliable checkout experience.
- Tested and optimized pages for **cross-browser compatibility** and responsive display across devices.
- Continued maintaining and updating the site's UI after launch.

Registon Education Center, *Freelance Developer*

09/2024 – 02/2025 | Samarqand, Registon

- Developed the frontend of [rgn.uz](#), the official website of **Registon Education Center** — a company with nearly **10 years of experience** and **50+ branches** across Uzbekistan.
- Built responsive landing pages using **HTML, CSS, and JavaScript**, including a hero section with a **lead-capture popup** ("Register for a free trial lesson") to collect names and phone numbers from prospective students.
- Implemented the **"Why Choose Registon"** section, highlighting **Support Teachers**, free **Mock Exams**, a dedicated **IELTS Test Center**, and **co-working zones** available at each branch.

- Developed the course information pages for **General English** (4 levels, from Beginner to Intermediate) and **IELTS** (Introduction and Graduation stages).
- Built an **interactive FAQ** (accordion-style) section and the "**About Us**" page presenting the company's mission and areas of operation.
- Built a **PHP-based Telegram bot** for the center, automating free trial lesson registration.
- Worked independently as a **freelancer**, delivering both the website frontend and the Telegram bot's backend logic from concept to deployment.

Skills

Node.js, NestJS, Express.js, Python, Django, JavaScript, TypeScript, HTML, CSS, Bootstrap, PostgreSQL, MySQL, SQL, SQLite, Redis, Telegram Bot, Git, GitHub, GitLab, CI/CD, Docker
